

HC 10 Double sided adhesive tape for holding honeycomb during machining

Tygavac Tape HC 10 is a double sided fabric reinforced tape with a thick coating of rubber resin adhesive. It has been developed for holding down honeycomb during machining operations, the thick adhesive coating ensuring that the honeycomb is held firmly in position. Release of the honeycomb is achieved more easily by spraying isopropyl alcohol through the open cells.

The use of a rubber resin adhesive ensures that there is no contamination transferred to the honeycomb which might cause subsequent bonding problems.

Typical Properties

Nominal thickness	0.35mm
Peel adhesion (180°C peel against steel)	10.0 N/cm
Adhesive	Rubber Resin
Colour	White
Shelf life	12 months when stored at 22°C

Availability

50mm x 50m rolls
Other widths available to special order
