

Tygathane Table top cover for use as a self sealing, non contaminating cutting surface

Tygavac Tygathane Cutting Surface is a material available in flat sheet form, which can be used as a non contaminating covering for cutting tables. It has self sealing characteristics, preventing the occurrence of scars in the working surface which can result in knife blade deflection during hand cutting of pre-pregs or other materials. The surface will minimise blunting of knife blades.

When one side of the sheet becomes worn, the other side can be used. A long life can be expected.

Typical Data

Hardness	90° Shore A
Thickness	6.0mm
Colour	Blue

Availability

Details of sheet sizes available on request.

Non-standard hardness and colours available.
